

Q. Where is the best MRI in Northern Illinois?

A. At the VA in the 10th Congressional District.

This morning, I toured the VA/Navy hospital in our district with officials from the VA and Navy. Due to the combination that saved our veterans hospital, we are home to the only VA with pediatric rooms.

The synergy between the two hospitals gives us the opportunity to offer state-of-the-art care for veterans, including the latest equipment.

North Chicago's VA is now home to the most advanced MRI machine in Northern Illinois. Rated at 3 teslas, it has twice the reach and imaging capability of MRIs at other hospitals.

It also stands as a symbol that Veterans should receive the best care we can provide.
